Absorbent types

Oil Only

- > A range of absorbents specially designed to absorb oil and repel water.
- > Designed for oil and other petroleum-based spills, they will not absorb water and will float indefinitely.
- > Unaffected by temperature and impervious to rot and mildew, they are ideal for outside use.
- > Equally effective in soaking up petroleum-based solvents and paints and other non-water soluble oil-based fluids.

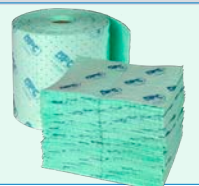

Maintenance

- > Use to clean up oils, coolants, solvents and water-based fluids anywhere in your facility.
- > For general indoor use around machinery, under leaky pipes or fittings, in messy traffic areas.
- > Coloured grey to help mask stains, helping you to resist the urge to pick up the absorbent before fully saturated.

Hazardous Liquids

- > Alert your employees to the presence of hazardous fluids with green chemical absorbents.
- > Surfactant treated absorbents which can be used on a wide range of chemicals, including hydrofluoric acid.
- > Chemically inert so will not react with aggressive fluids.

1000 Litre Mobile Spill Kit

A new extra-sized Spill Kit that is able to absorb the full contents of an 1000 Litre IBC if it starts leaking or is damaged when being transported.

In most industries, IBC's are probably the most commonly used container to store and transport liquids. Typically, IBC's are stored on bunded Spill Pallets that can hold their entire contents in case of an incident.

But what if an accident happens when moving or transporting an IBC?

- > Absorbs up to 972 litres (full content of an IBC).
- > On rubber wheels to easily manoeuvre to spill locations.
- > Top and drop front lids provide fast and easy access to contents.

Contents:

- > 2 rolls, 38cm x 46m
- > 4 booms, Ø 13cm x 3m

- > 1 pair of disposable gloves
- > 50 waste bags + ties

Note: contents given are for SKO-1100; while total absorption capacity remains the same, contents may vary slightly for SKA-1100 and SKH-1100.
